

Climate Springboard

A **free programme** to help small-medium businesses prepare for Net Zero

The business case for climate action

Stay on top of new regulation

UK government already requires 'large' organisations to report on carbon emissions in annual reports.

Don't miss out on funding

Many business support agencies require a Net Zero Action Plan to maintain or access grants.

What does it cover?

Scotland's net zero goal and why it matters for SMEs.

Telling your climate story, to the public and internally and meet tender conditions.

How to measure your carbon footprint and create a climate strategy

Practical recommendations to reduce your emissions

Who can join

- Scotland based trading SMEs
- Any sector

Worried this isn't for you?

You do not need to be a climate expert! We have supported businesses at all stages of their net-zero journey.

What to expect

- 3 x live, online workshops
- Post-session action-plans
- 1-2-1 support from experts
- Monthly rolling cohorts

Participant insights

"[Our] company was paying £5000 for a scope 1 carbon footprint. [Climate Springboard taught us to] do it for free!"

" Our [carbon reduction plan] has enabled us to make sure we are delivering the best response for a tender because we can give very accurate information."

Ready to reduce your costs, increase your customers and lower your carbon footprint?
